

Hurdles	Most Basic Features	Future Expansion	Platform / Application Type	Product Ideas	Pricing
<div>Limitations on web scraping permissions</div> <div>Nick Juneau</div>	<div>Gather the live data from the pre-existing LaundryView application</div> <div>Nick Juneau</div>	<div>Maybe in the future there could be a feature that allows the user to input their schedule. The application will then compare the users schedule to the laundry schedule and recommend times for them to do their laundry</div> <div>Nick Juneau</div>	<div>App</div> <div>Nick Juneau</div>	<div>Interactive app - Has the option to see a graph of activity in the laundry room.</div> <div>Nick Juneau</div>	<div>Could make the solution locked behind a monthly subscription model</div> <div>Nick Juneau</div>
<div>Organizing the data in a easy to read manner</div> <div>Nick Juneau</div>	<div>Store the laundry data from the past 30 days</div> <div>Nick Juneau</div>	<div>The application could also work on other needs that have limited capability. For example, you could track how many people are in a gym and give the user times that the gym is less busy.</div> <div>Nick Juneau</div>	<div>Website</div> <div>Nick Juneau</div>	<div>Website - Simply displays the activity in the laundry room</div> <div>Nick Juneau</div>	<div>One time payment of a reasonable amount.</div> <div>Nick Juneau</div>
<div>Reliability of LaundryView. The site may not always be up. My application would rely on LaundryView being functional.</div> <div>Nick Juneau</div>	<div>Present the data in a easy-to-understand format for the user.</div> <div>Nick Juneau</div>				<div>Could run ads to allow revenue without a subscription model. If user doesn't want ads... they can pay for an ad free version.</div> <div>Nick Juneau</div>
<div>Sometimes laundry machines are broken, but say they are available when in reality you can't use it. This is a problem because this will skew the data.</div> <div>Nick Juneau</div>	<div>The data presented will allow the user to see what times the laundry room is more available.</div> <div>Nick Juneau</div>				
	<div>Can track when you usually do your laundry.</div> <div>Nick Juneau</div>				
	<div>Will be able to push notifications to the user when to do laundry.</div> <div>Nick Juneau</div>				
	<div>User can customize a preference of when they want reminders for when to do laundry and how early before the time-slot.</div> <div>Nick Juneau</div>				
	<div>User can report problems with the physical washing machines themselves. This would combat the issue of a washing or dryer being down.</div> <div>Nick Juneau</div>				
	<div>Allowing the user to report when washers or dryers are back up will allow the application to run smoother without data being skewed.</div> <div>Nick Juneau</div>
